

Siva Mamidipalli

(617) 448-6433 • mamidipalli.si@northeastern.edu • www.linkedin.com/in/siva-mamidipalli

Professional Summary

Senior DevOps Engineer with 11+ years navigating complex IT environments, consistently delivering under pressure, proactively identifying risks before they escalate, mentoring team members, owning P1 incidents end-to-end, and bringing both technical depth and leadership maturity to every project.

Experience

Fastenal

IT Senior DevOps Engineer

Bangalore, India

Aug 2019 – Nov 2024

- End-to-end application SDLC, DevSecOps automation, and delivery across cloud and hybrid infrastructure covering IAM/RBAC, SSL, DNS, firewalls, WAF, CDN, load balancing, APIM, API/MQ, logging, monitoring, backup, DR, and SOX/PCI compliance.
- Managed full delivery lifecycle from Dev to Prod go-live, handling P1 escalations, driving RCA, and ensuring zero-downtime cutovers.
- Integrated SAST (Coverity, SonarQube) and SCA/vulnerability scanning (RiskSense, Tenable.io) into CI/CD pipelines across Java, .NET, PHP, and Node.js projects; triaged findings, partnered with development teams to explain security issues, guided remediation, and achieved zero critical findings during SOX/PCI audits.
- Conducted web, API, and mobile application security assessments including DAST against externally facing services and REST/Kafka-based integrations; enforced PCI-DSS/SOX compliance controls and produced findings reports with prioritized remediation guidance for development teams.
- Developed Python and Bash scripts to automate security tool integrations within the CI/CD ecosystem: including automated Tenable.io scan triggers, vulnerability ingestion pipelines, and SAST/SCA result aggregation: reducing manual security overhead by 70% across all environments.
- Embedded developer-friendly security tooling into CI/CD pipelines (Jenkins, TeamCity, Octopus Deploy, Azure DevOps) to shift security left, reducing vulnerability backlog and manual release errors across all environments.
- Remediated critical vulnerabilities identified by Tenable.io and RiskSense, collaborating directly with application teams on findings, closure workflows, and remediation guidance across Dev/QA/UAT/Prod.
- Supported end-to-end application security services including assessment intake, scoping, tool onboarding, findings validation, and security reporting; engaged application teams throughout the remediation lifecycle to ensure timely closure of vulnerabilities across web, API, and backend services.
- Led and mentored a 10-member distributed DevOps team across capacity planning and sprint execution; delivered three core business platforms: Ecommerce, Retail, and Vending Machines: end-to-end from kickoff through production.
- Architected 30+ production environments across on-premises, AWS, and Azure; configured OS hardening, app servers (JBoss, Tomcat, IIS, WebLogic), IAM/AD RBAC, secrets management, and MuleSoft Anypoint Platform administration.
- Implemented observability (LogicMonitor, AppDynamics, ELK Stack) and automated 50+ operations including SSL renewals, cipher updates, and Ansible-driven Oracle upgrades (10c to 19c), reducing manual effort by 90%.
- Managed 24/7 production operations achieving 99.9% uptime; led P1 incidents via PagerDuty and RCA calls; executed quarterly DR drills with zero failures maintaining RTO/RPO targets.

FIS (Fidelity Information Services)

Senior Systems Engineer

Bangalore, India

Nov 2018 – Jun 2019

- Architected AWS cloud migration strategy for a core banking platform from scratch, designing multi-tier VPC with public/private subnets across multiple AZs, EC2 with IAM roles, ELB, RDS Multi-AZ (Oracle) with encryption, ElastiCache (Redis), NAT Gateway, bastion hosts, and VPN for hybrid connectivity.
- Defined infrastructure standards for Route 53 DNS, CloudWatch monitoring, S3 lifecycle policies, and automated RDS/EBS snapshot backups; established PCI-DSS compliance controls covering IAM, encryption at rest/transit, and CloudTrail auditing as part of the migration blueprint.

Softtek (Client: Southwest Airlines)

Technical Specialist

Bangalore, India

Feb 2016 – Oct 2018

- Delivered 24/7 operations for enterprise Java application infrastructure supporting the LoneStar Project, managing WebSphere, Tomcat, and TC-Server on RHEL and Windows, implementing blue/green deployments via F5 BIG-IP pool switching, integrating CyberArk for secure credential fetching, managing Venafi SSL lifecycle, performing JVM performance tuning, and monitoring platform health using Grafana.

- Managed TIBCO middleware stack (BusinessWorks, BusinessEvents, EMS) and IBM MQ with HA clustering, configured SSL/TLS messaging patterns, and resolved production issues including connection failures and poison message handling.

Hewlett Packard
Software Engineer

Bangalore, India
Aug 2014 – Oct 2015

- Administered 1000+ VMs across RHEL environments on HP ProLiant servers, enforcing SELinux policies, firewall rules, kernel tuning, and OS patching.
- Operated VMware ESXi/vCenter with HA/DRS cluster management, vMotion live migrations, SAN/NAS storage administration, and capacity planning for zero-downtime operations.

Adduri Technologies Pvt Ltd (Client: VISA Payment Gateway)
System Administrator

Chennai, India
Dec 2013 – Aug 2014

- Managed mission-critical datacenter infrastructure for VISA payment processing, handling rack and stack of HP, Dell, and Sun blade servers with iLO/iDRAC/ALOM hardware management, FC/iSCSI SAN zoning, RAID configuration, VTL backup management, and firmware maintenance.
- Administered OS hardening on Linux and Windows, datacenter access control, and network infrastructure including Brocade switches, Fortigate firewalls, and F5 BIG-IP load balancers.

Technical Skills

Application Security	SAST (Coverity, SonarQube), SCA, DAST, API Security, Mobile Security Tenable.io, RiskSense, Trivy Vulnerability Management, Remediation Guidance, PCI-DSS, SOX
CI/CD & DevSecOps	Jenkins, TeamCity, Octopus Deploy, GitHub Actions, GitLab, Bitbucket, Azure DevOps Security-in-pipeline integration, shift-left tooling
Cloud & Infra	AWS, Azure, VMware vSphere/ESXi Terraform, Ansible Docker, Kubernetes RHEL, Solaris, Windows Server
Networking & Security	F5 BIG-IP GTM/LTM, HAProxy, Akamai CDN/WAF, DNS, VPN Zero Trust, RBAC, MFA, CyberArk, Venafi, AppViewX, SSL/TLS
Middleware & Integration	MuleSoft RM, TIBCO BW/EMS, IBM MQ, WebSphere, JBoss, Tomcat, NGINX, IIS, WebLogic, Kafka, REST APIs
Observability & Testing	LogicMonitor, AppDynamics, ELK Stack, PagerDuty JMeter, Katalon
Data	Oracle, MySQL, Snowflake, Liquibase
Scripting & Languages	Python, Bash, PowerShell Java, .NET, PHP, Node.js
Build & Artifact Mgmt	Nexus, Maven, npm, MSBuild
Business Continuity & BI	DR Planning, High Availability, RTO/RPO Tableau, Power BI
ITSM	ServiceNow, Jira, Confluence

Education

Northeastern University

Master of Professional Studies (MPS) in Informatics | GPA: 4.0 / 4.0

Boston, MA
Jul 2025 – Jun 2026

Sanketika Vidya Parishad Engineering College, Andhra University

B.E. in Electrical and Electronics | CGPA: 6.8 / 10

India
Sep 2007 – Jun 2011

Awards & Recognition

Fastenal India (2019–2024): Multiple Spot Awards

Softtek / Southwest Airlines (2016–2018): Certificate of Nomination for All-Star Award | Recognition by Voice of Management | Extraordinary Service Award

Hewlett Packard (2014–2015): Best Employee of the Month
